

Psychiatric Services for Clinics & Community Health Centers

Expanding psychiatric access for patients while supporting primary care teams.

Atlas Mind Group partners with primary care clinics and community health centers across California to provide telepsychiatric evaluation, medication management, and diagnostic consultation. Many clinics face long wait times for psychiatric care, leaving primary care providers managing complex behavioral health conditions without specialist support.

Our goal is to help clinics expand access to psychiatric expertise while improving patient outcomes and reducing provider burden.

Core Services

Psychiatric Evaluations

Comprehensive psychiatric assessments for patients referred by primary care providers.

Medication Management

Ongoing psychiatric medication monitoring, stabilization, and adjustment.

Diagnostic Clarification

Evaluation of conditions such as ADHD, anxiety disorders, mood disorders, and other behavioral health concerns.

Provider Consultation

Collaborative consultation with primary care providers regarding complex psychiatric cases.

Partnership Model

Atlas Mind Group offers flexible telepsychiatry partnerships designed to integrate with clinic workflows.

A common model includes **dedicated psychiatric consult blocks**, such as a weekly 4-hour telepsychiatry session where referred patients are scheduled directly by the clinic.

This approach allows clinics to:

- expand psychiatric capacity
 - reduce waitlists
 - provide faster access to medication management
 - support PCPs managing behavioral health needs
-

Benefits for Clinics

Partnering with Atlas Mind Group can help clinics:

- Reduce psychiatry waitlists
 - Improve access to psychiatric medication management
 - Support PCPs treating behavioral health conditions
 - Increase patient retention and continuity of care
 - Integrate telepsychiatry into existing clinic workflows
-

Partnership Inquiries

Atlas Mind Group welcomes partnership inquiries from clinics and community health centers seeking psychiatric consultation services.
